

paceval\_fGetComputationResultExt

paceval\_InitializeLibrary

pacevalLibrary\_fGetComputation  
ResultExt

```
graph LR; A[paceval_fGetComputationResultExt] --> C[pacevalLibrary_fGetComputationResultExt]; B[paceval_InitializeLibrary] --> C;
```

The diagram illustrates a mapping from two external functions to a single library function. On the left, two white rectangular boxes with black borders contain the text 'paceval\_fGetComputationResultExt' and 'paceval\_InitializeLibrary'. On the right, a larger gray rectangular box with a black border contains the text 'pacevalLibrary\_fGetComputationResultExt'. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box, indicating that both functions are implemented or mapped to the library function.
